Abstract

This work is an example of an academic work typeset with the abntly package, which applies the ABNT standards to documents written in Typst. The example gathers the pre-textual, textual and post-textual elements defined by NBR 14724:2024 and shows, in a chapter of its own, how to write sections, lists, citations, footnotes, illustrations, tables and equations. The text of the other chapters is only illustrative. The code of this example can be used as the starting point of a new work, or read to check how a given element is written.

Keywords: academic works; standardization; ABNT; Typst.

Resumo

Este trabalho é um exemplo de trabalho acadêmico composto com o pacote abntly, que aplica as normas da ABNT a documentos escritos em Typst. O exemplo reúne os elementos pré-textuais, textuais e pós-textuais definidos pela NBR 14724:2024 e mostra, em um capítulo próprio, como escrever as seções, as alíneas, as citações, as notas de rodapé, as ilustrações, as tabelas e as equações. O texto dos demais capítulos é apenas ilustrativo.

1 Introduction

This document is an example of an academic work typeset with the abntly package. It has two aims: to show the result of each element of the structure defined by Brazilian Standard (NBR) 14724:2024, and to be the starting point of a new work. The code of the example is divided into a main file, with the pre-textual and the post-textual elements, and a file for each chapter.

The standard organizes the work in three parts. The pre-textual elements go from the title page to the summary. The textual elements are the introduction, the development and the conclusion. The post-textual elements are the references, the glossary, the appendices, the annexes and the index (Associação Brasileira de Normas Técnicas, 2024).

1.1 Aims

The general aim of this example is to gather, in one document, every element of an academic work. The specific aims are:

a) to show the pre-textual and the post-textual elements, in the order defined by the standard;
b) to show how each element of the text is written, in Chapter 2;
c) to offer filler text for the other chapters, so that the pagination, the running header and the summary can be seen in a document of several pages.

1.2 Organization of the document

Chapter 2 presents the elements of the text. Chapter 3 and Chapter 4 hold filler text, a table that takes more than one page and a table lying on its side. Chapter 5 closes the text.

Part I

Preparing the research

2 Elements of the text

This chapter shows how the elements of the text are written and how the package presents them. The rules of each element are in section 5 of NBR 14724:2024 and in the standards it cites.

2.1 Sections

The sections are numbered progressively, down to the fifth level. The title of a primary section starts on a new page, and the levels are set apart by the size of the type.

2.1.1 Tertiary section

Text of a tertiary section.

2.1.1.1 Quaternary section

Text of a quaternary section.

2.1.1.1.1 Quinary section

Text of a quinary section.

2.2 Lists

The subjects that have no title of their own are divided into lettered items (alíneas):

a) the text before the items ends with a colon;
b) each item starts with a lower-case letter and ends with a semicolon:
   – the sub-items start with a dash;
   – the item before the sub-items ends with a colon;
c) the last item ends with a period.

2.3 Citations

The citations follow the author-date system. A work can be cited between parentheses (Luck, 2010) or in the sentence, as in Oliveira and Leonardos (1943). In direct quotations, the call includes the page (Luck, 2010, p. 12). A work with three authors is cited with every surname (Cruz; Correa; Costa, 1998); with four or more,

by the first author, followed by "et al." (Maciel *et al.*, 2019). Two works can be cited in one call (Romano, 1996; Santos, 1994). Entities are cited by their name (Associação Brasileira de Normas Técnicas, 2024), and works without an author, by the first word of the title (Anteprojeto [...], 1987, p. 55).

A direct quotation of up to three lines stays in the text, "between double quotation marks" (Author, 2026, p. 10). A direct quotation of more than three lines is set apart:

> Text of a direct quotation of more than three lines. The quotation is set apart from the paragraph, indented 4 cm from the left margin, in a size smaller than that of the text, in single spacing and without quotation marks (Author, 2026, p. 11).

The other works in the list of references show other kinds of document: a thesis (Aguiar, 2009), a dissertation in electronic form (Coelho, 2009), a journal article (De Lucca, 2009), a newspaper article (Veríssimo, 2010) and a paper presented at an event (Brayner; Medeiros, 1994).

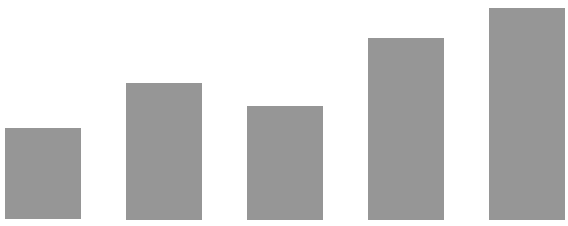

2.4 Footnotes

The footnotes are numbered through each chapter.[1] In a note of more than one line, the following lines are aligned under the first letter of the text.[2]

2.5 Illustrations

Every illustration has its title above it and its source under it. Figure 1 shows a figure with a source, a legend and a note.

Figure 1 — Works defended per year

Source: Prepared by the author.

Legend: Bars: number of works defended in each year, from 2021 to 2025.

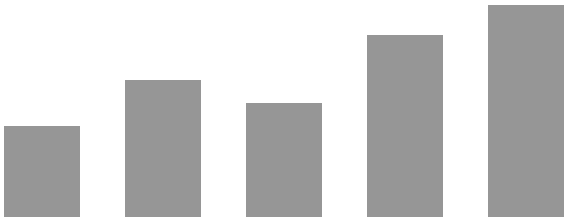

Note: Fictitious data, used only in this example.

[1] Text of a short footnote.

[2] Text of a longer footnote, with enough words to take more than one line and to show how the text of the note is aligned in relation to its number.

With the function `fitted`, the title and the source stay within the width of the illustration, as in Figure 2.

Subfigures gather several parts in one figure: Figure 3a and Figure 3b are parts of Figure 3.

2.6 Tables

The tables follow the tabular presentation standards of the Brazilian Institute of Geography and Statistics (IBGE). Table 1 has a general note and a specific note.

Table 1 — Works defended, by kind – University of Brazil – 2024-2025

[1] Includes the theses defended under joint supervision.

A table in a plain `figure` takes the same rules with `ibge-table`; the title and the source keep the width of the text block, and the figure may float, as Table 2 does.

2.7 Equations

The arithmetic mean of n values is given by (2.1):

$$\overline{x} = \frac{1}{n}\sum_{i=1}^{n} x_i \tag{2.1}$$

An equation without a label is not numbered:

$$\sigma^2 = \frac{1}{n}\sum_{i=1}^{n} (x_i - \overline{x})^2$$

In an equation of several lines, only the line with a label takes a number, as (2.2):

$$\begin{aligned} (a+b)^2 &= (a+b)(a+b) \\ &= a^2 + 2ab + b^2 \end{aligned} \tag{2.2}$$

The text that goes on after an equation, past a blank line, starts without the indent of its first line, with `no-indent`:

$$s = \sqrt{\sigma^2}$$

where s is the standard deviation.

2.8 Algorithms

An algorithm is an illustration of code, with a title and a source, as Algorithm 1.

Algorithm 1 — Mean of a list of numbers

```
def mean(values):
    total = 0
    for v in values:
        total = total + v
    return total / len(values)
```

Source: Prepared by the author.

2.9 Cross-references

A cross-reference can be written in three ways. The plain one gives only the number, as in "figure 1". The one with the word gives the name and the number, as in "Table 1". The function `auto-ref` finds the name of the element: Figure 1, Frame 1, Table 1, Chapter 2 and Equation (2.1). It also gives the page of the element: Figure 1 is on p. 21.

5 Conclusion

This example gathered the elements of an academic work in the standards of the Brazilian Association of Technical Standards (ABNT). The pre-textual and the post-textual elements were created by the functions of the package, and the elements of the text were written with the markup of Typst and with the functions `source`, `legend`, `note`, `frame`, `fitted`, `ibge-table` and `no-indent`.

To start a new work, copy the main file of this example, replace the data of the work and write each chapter in a file of the folder `chapters/`.

Appendices

APPENDIX A — Checklist of the work

Before the deposit, the author can check the following items:

a) the required elements are present, in the order of the standard;
b) every illustration and every table has a title and a source and is cited in the text;
c) every work cited is in the list of references.

A.1 Items of the printed version

In the printed version, the links are set in black and the work uses the two-sided margins.

APPENDIX B — Additional data

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguique possit, augeri amplificarique non possit. At.
